This project is funded by **The European Union**  
A project implemented by a Consortium led by **European Profiles S.A.**

# CATALOGUE

## of Slovak companies interested in doing business in Uzbekistan and/or Central Asia

SLOVAK | BUSINESS | AGENCY

Issued by the **Slovak Business Agency** within the frames of the project Management Training Programme – Capacity Building for SME Management in Uzbekistan

## Background information

This catalogue was produced by the Slovak Business Agency /SBA/ within the frames of the project Management Training Programme (MTP) - Capacity Building for SME Management in Uzbekistan. The project is implemented from August 2013 until August 2016 thanks to the support of the European Union. It is executed by the consortium led by [European Profiles S.A.](#) (Greece) and consists of [WYG International Limited](#) (United Kingdom), [CCI Paris Ile-de-France](#) (France), [Birmingham Chamber of Commerce](#) (United Kingdom), [PLANET S.A.](#) (Greece) and Anticrisis Management Consulting (Uzbekistan). The [Chamber of Commerce and Industry of the Republic of Uzbekistan](#) is a local project partner.

The overall objective of the project is to contribute to the improvement of the performance of the SME sector in the Republic of Uzbekistan. In order to achieve the goals of the project, as one of the project components, it is planned to organize practical internships in the EU companies for selected managers from leading Uzbek private sector companies.

In June 2014 SBA organized an informative seminar in Bratislava which focused on the perspectives of doing business in Uzbekistan. The aim of the event was to inform Slovak firms of the support provided by Slovak business support organizations and the European Union when establishing business cooperation with the companies from Uzbekistan. Slovak companies were encouraged to start exploring the fast-growing Uzbek market of 30 million consumers.

The Slovak companies were included in this list based on their participation in the informative seminar and/or their registration in the Database of International Cooperation managed by SBA. The data included in the list will regularly be updated so that listed companies receive updates on business and technological cooperation in Uzbekistan including offers on hosting managers from Uzbek SMEs.

Other companies wishing to be listed in this catalogue are welcome to contact Tigran Aleksanyan, the person responsible for the catalogue at [aleksanyan@sbagency.sk](mailto:aleksanyan@sbagency.sk).

More information about the project MTP is available at <http://mtpeu.uz/>.

Established in 2009 (Experience dating to 1993).

ADRIAN GROUP produces energy-efficient gas heating systems for large volume premises (industrial buildings, warehouses, maintenance halls, depots, logistics and car parks, exhibition centres, agricultural objects, etc.). They are based on infrared radiant and air heating and provide comfort and desired temperature regimes with optimal economies.

ADRIAN® heating systems include:

- gas infrared heaters;
- hot-air gas fired units; hot-air water units;
- devices for destratification;
- heating in agricultural objects;
- devices for regulation and control of heating operations.

Modernisation of heating based on ADRIAN® system means:

- direct savings on gas consumption of at least 30%;
- economies on heating costs up to 80% in a season;
- investment costs return per 1 – 2 heating seasons;
- comfort and simplicity;
- guaranteed temperature regimes.

The company provides customers with:

- consultations on the type of a heating system required;
- complex calculations for chosen solution;
- project design assistance;
- possibilities of financing;
- customer service through their network of partners.

The company has necessary national certifications, the product is certified for ISO 9001:2008 and European Certificate CE.

Number of employees: 9 permanent, 40 external partners

## **Slovak Business Agency**

For more than 20 years the Slovak Business Agency (SBA) has been supporting development and growth of Slovak SMEs to improve their competitiveness at the local, regional, national levels, on the EU market and globally. The non-profit seeking organization is a unique platform of the public and private sector initiated by the European Union and the Slovak Government. The Agency was founded by the Slovak Ministry of Economy, the Slovak Association of Crafts and the Entrepreneurs Association of Slovakia, the latest being a decisive representative of private business sector which did not exist in Slovakia before 1989.

The Agency has become a think-tank that identifies and analyses the barriers of the business community in Slovakia. It prepares strategies and drafts proposals how to tackle them. Combining data with being an SME envoy, with power delegated by the Ministry of Economy, SBA is responsible for establishing a close, direct link between the European Commission, SMEs and their representatives. This is emphasized also via Enterprise Europe Network (formerly Euro Info Centre) – the global network existing across the EU and beyond, which helps small businesses to make the most of the European marketplace. It provides business advisory and support to the existing or start-up companies, fosters their internationalization, innovation capacity, promotes the international transfer of innovation and technologies etc. To further shape and profit from the European policy, the Agency is also member of various global and European networks such as the UEAPME, the European Association of Craft, Small and Medium-sized Enterprises, which acts on behalf of crafts and SMEs in the European Social Dialogue and in discussions with the EU institutions. Besides, SBA is one of the founders of the Slovak Entrepreneurs' Platform for Foreign Development Cooperation which is to further use the potential of Slovak businesses to contribute to tackling global issues in selected developing countries.

**SLOVAK ENTREPRENEURS'  
PLATFROM**  
4 FOREIGN DEVELOPMENT COOPERATION

### **Slovak Entrepreneurs' Platform for Foreign Development Cooperation**

The platform was founded in March 2013 to bring together private sector representatives interested in shaping the Slovak policy of official development assistance, implementing development projects and supporting economic diplomacy in practice. In order to achieve these goals the Platform contributes to:

- Increase in the participation of Slovak companies in international development cooperation, i.e. development projects in developing countries
- Advocacy and change of the system of the Slovak foreign development cooperation and representation of the interests of the business community within it
- Coherence between the principals of foreign development cooperation and the support of export activities of Slovak business entities
